Fatal Occupational Injuries in New Jersey – 2018

Fatal work injuries in New Jersey totaled 83 in 2018, the U.S. Bureau of Labor Statistics reported today. Chief Regional Economist Martin Kohli noted that the number of work-related fatalities in New Jersey increased by 14 from the previous year. Fatal occupational injuries in the state have ranged from a high of 145 in 1993 to a low of 69 in 2017. (See [chart 1](#).)

Nationwide, a total of 5,250 fatal work injuries were recorded in 2018, up from the 5,147 fatal injuries in 2017, according to the results from the Census of Fatal Occupational Injuries (CFOI) program.

Chart 1. Total fatal occupational injuries, New Jersey, 2009–2018

Source: U.S. Bureau of Labor Statistics.

Type of incident

In New Jersey, transportation incidents resulted in 32 fatal work injuries and falls, slips, and trips accounted for 16 fatalities. These two major categories accounted for 58 percent of all workplace fatalities in the state. (See [table 1](#).) The number of worker deaths from transportation incidents increased by 7 over the year, and worker fatalities due to falls, slips, and trips increased by 4.

Violence and other injuries by persons or animals was the third-most frequent fatal work event with 13 fatalities, followed by exposure to harmful substances or environments, which resulted in 12 work-related deaths. In 2017, each of these categories accounted for 10 occupational fatalities in New Jersey.

Nationally, transportation incidents were the most frequent fatal workplace event in 2018, accounting for 40 percent of fatal work injuries. (See [chart 2.](#)) Violence and other injuries by persons or animals was the second-most common fatal event (16 percent), followed by falls, slips, and trips (15 percent) and contact with objects and equipment (15 percent).

Chart 2. Fatal occupational injuries by selected event, United States and New Jersey, 2018

Industry

The private construction industry sector had the largest number of fatalities in New Jersey with 23, up from 14 in the previous year. (See [table 2.](#)) Falls to a lower level were the most frequent fatal event in the construction sector with 10 worker deaths, followed by transportation incidents with 8 fatalities. Almost half (48 percent) of those fatally injured in this sector worked in specialty trade contracting.

The private transportation and warehousing sector had 14 workplace fatalities, up from 11 in the previous year. Two industries—long-distance general freight trucking along with warehousing and storage—each accounted for 4 worker deaths in the sector.

Occupation

Transportation and material moving occupations and construction and extraction occupations had the highest number of workplace fatalities with 31 and 23, respectively. (See [table 3.](#)) The majority of the fatalities within the transportation and material moving group involved motor vehicle operators (17). Construction trades workers accounted for 16 of the 23 fatalities among construction and extraction workers.

Contracted Workers

A contractor is defined as a worker employed by one firm but working at the behest of another firm that exercises overall responsibility for the operations at the site of the fatal injury. In 2018, New Jersey had 14 fatally-injured workers identified as fitting the contractor criteria.

Additional highlights

- Men accounted for 93 percent of the work-related fatalities in New Jersey, similar to the national share. (See [table 4.](#)) Transportation incidents made up 39 percent of the fatalities for men in the state.
- White non-Hispanics accounted for 52 percent of those who died from a workplace injury. Nationwide, this group accounted for 65 percent of work-related deaths.
- Workers 25-54 years old accounted for 55 percent of the state's work-related fatalities in 2018, compared to 58 percent of on-the-job fatalities nationally.
- Of the 83 fatal work injuries in New Jersey, 82 percent involved wage and salary workers; the remainder of the decedents were self-employed.

Technical Note

Background of the program. The Census of Fatal Occupational Injuries (CFOI), part of the Bureau of Labor Statistics (BLS) Occupational Safety and Health Statistics (OSHS) program, is a count of all fatal work injuries occurring in the U.S. during the calendar year. The CFOI uses a variety of state, federal, and independent data sources to identify, verify, and describe fatal work injuries. This ensures counts are as complete and accurate as possible. For the 2018 data, over 24,800 unique source documents were reviewed as part of the data collection process. For technical information and definitions for the CFOI, see the BLS Handbook of Methods on the BLS website at www.bls.gov/opub/hom/cfoi/home.htm.

Federal/State agency coverage. The CFOI includes data for all fatal work injuries, some of which may be outside the scope of other agencies or regulatory coverage. Comparisons between CFOI counts and those released by other agencies should account for the different coverage requirements and definitions used by each agency. For more information on the scope of CFOI see www.bls.gov/iif/cfoiscope.htm and www.bls.gov/opub/hom/cfoi/concepts.htm.

Acknowledgments. BLS thanks the New Jersey Department of Health for their efforts in collecting accurate, comprehensive, and useful data on fatal work injuries. BLS also appreciates the efforts of all federal, state, local, and private sector entities that provided source documents used to identify fatal work injuries. Among these agencies are the Occupational Safety and Health Administration; the National Transportation Safety Board; the U.S. Coast Guard; the Mine Safety and Health Administration; the Office of Workers' Compensation Programs (Federal Employees' Compensation and Longshore and Harbor Workers' Compensation divisions); the Federal Railroad Administration; the National Highway Traffic Safety Administration; state vital statistics registrars, coroners, and medical examiners; state departments of health, labor, and industrial relations and workers' compensation agencies; state and local police departments; and state farm bureaus.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Table 1. Fatal occupational injuries by event or exposure, New Jersey, 2017–18

Event or exposure ⁽¹⁾	2017	2018	
	Number	Number	Percent
Total.....	69	83	100
Violence and other injuries by persons or animals.....	10	13	16

Struck by falling object or equipment--other than powered vehicle.....	--	5	6
Struck by object falling from vehicle or machinery--other than vehicle part	--	3	4
Overexertion and bodily reaction.....	--	--	--

Footnotes:

(1) Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

Note: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

Footnotes:

(1) Occupation data are based on the Standard Occupational Classification system, 2010.

(2) Includes fatal injuries to persons identified as resident armed forces regardless of individual occupation listed.

Note: Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

Table 4. Fatal occupational injuries by selected demographic characteristics, New Jersey, 2017–18

Worker characteristics	2017	2018	
	Number	Number	Percent
Total	69	83	100
Employee status			
Wage and salary workers ⁽¹⁾	50	68	82
Self-employed ⁽²⁾	19	15	18
Gender			
Men	68	77	93
Women	--	6	7
Age ⁽³⁾			
16 to 17 years	1	--	--
18 to 19 years	1	--	--
20 to 24 years	1	7	8
25 to 34 years	10	10	12
35 to 44 years	14	16	19
45 to 54 years	17	20	24
55 to 64 years	15	19	23
65 years and over	9	11	13
Race or ethnic origin ⁽⁴⁾			
White, non-Hispanic	48	43	52
Black or African-American, non-Hispanic	8	11	13
Hispanic or Latino	11	22	27
Asian, non-Hispanic	--	4	5

Footnotes:

(1) May include volunteers and workers receiving other types of compensation.

(2) Includes self-employed workers, owners of unincorporated businesses and farms, paid and unpaid family workers, and may include some owners of incorporated businesses or members of partnerships.

(3) Information may not be available for all age groups.

(4) Persons identified as Hispanic or Latino may be of any race. The race categories shown exclude data for Hispanics and Latinos.

Note: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.
